

## What is Private-Duty Nursing?

Private Duty Nursing (PDN) is provided as in-home care by Registered Nurses (RN) or Licensed Vocational Nurses (LVN). Private-Duty Nursing focuses on one-on-one medical care.

- **G-Tube Feedings**

Safe nutrition delivery through gastrostomy tubes for children unable to eat orally. Services include equipment setup, feeding administration, documentation tracking, and outcome monitoring.

- **Ostomy Care**

Support for children with surgically created openings (stomas). Includes area cleaning, regular inspection, and ostomy bag changes.

- **Oral Suctioning**

A gentle medical procedure used to help children who have trouble clearing saliva, mucus, or other secretions from their mouth. Prevents choking and infections.

- **CPT Vests and Nebulizer**

CPT Vests gently vibrate the chest to help loosen mucus in the lungs. Nebulizers convert liquid medicine into inhalable mist for respiratory conditions.

- **Trach, Vent, and O2 Care**

Specialized breathing support including tracheostomy care, ventilator management, and oxygen therapy.

- **IV and TPN Care**

Manages fluids, medications, and nutrition delivered intravenously or through total parenteral nutrition.

- **Psycho-Social Assessments**

Comprehensive emotional and social well-being evaluations supporting entire families.

- **Care Coordination and Training**

Nurses coordinate with medical teams and provide family training on equipment and medications.
